SKILLS

Technical Skills:

- **Frontend**: React.js, React Native, Angular, Next.js, JavaScript, TypeScript, Redux Toolkit, Tailwind CSS
- **Frontend Engineering**: Responsive Design, Component Architecture, State Management, REST API Integration, WebSockets, Performance Optimization
- **Backend**: Node.js, Express.js, NestJS, REST APIs, WebSockets, JWT, OAuth
- **Databases**: MongoDB, PostgreSQL, Prisma, Mongoose, SQL
- **DevOps & Tools**: AWS (EC2, S3), Git, GitHub, CI/CD, Bash Scripting
- **Software Principles**: SOLID Principles, OOP, Design Patterns, Agile Methodologies

Soft Skills: Teaching, Problem Solving, Communication, Adaptability, Teamwork, Creativity

SUMMARY

Frontend Engineer specializing in React.js and TypeScript, with 4 years of experience building responsive, scalable, and production-ready web applications. Experienced in developing complex frontend systems using React, Redux Toolkit, Next.js, and Tailwind CSS, with strong expertise in REST API integration, real-time applications, authentication, and performance optimization. Currently contributing to Dolphin, an online education platform serving 5,000+ students.

PROFESSIONAL EXPERIENCE

Frontend Developer | Zone Net Digital Solutions **July 2025 – Present**

- Developed **Dolphin**, an online education platform serving 5,000+ students.
- Engineered a Teacher Dashboard that increased instructor efficiency by 40% through automated progress tracking

INTERNSHIPS

Angular Frontend Developer- NXT R3 **Digital Egypt Pioneers Initiative - DEPI**

June 2025 – Dec 2025 (6 months)

- Mastered Angular, TypeScript, JavaScript, HTML5, CSS3, Bootstrap, Node.js, Express, and MongoDB for building scalable web applications.
- Proficient in responsive UX/UI design, RESTful APIs, and modern development practices

ICC - R1-23/24 Front-End Cross Platform **Information Technology Institute (ITI)**

July 2023 – Nov 2023 (4 months)

- Developed **"JUNO"**, an interactive educational game using **jQuery, Bootstrap, and CSS3**.
- Collaborated in an **Agile team** to deliver a responsive, cross-platform front-end solution.

Advanced Full-Stack Web Development 2022 **Udacity**

Oct 2022 - Feb 2023 (3 months)

- Built and deployed a **full-stack application on AWS**, integrating **PostgreSQL, Express.js, and CI/CD pipelines**.
- Developed a **RESTful API** with secure authentication (JWT) and optimized database queries for performance.

Front-end Developer **Information Technology Institute (ITI)**

Jun 2022 - Jul 2022 (1 month)

- HTML/CSS development and managing the entire front-end using Bootstrap and
- JavaScript. Some experience with React and wireframing.

EDUCATION

Bachelor of Computer Science | Assiut University

- Graduated with Good Honors.
- Relevant coursework: Algorithms, Data Structures, Database Systems, Web Development.

KEY PROJECTS

Dolphin / Learn at Dolphin

- Developed and maintained a production-scale education platform serving **5,000**+ students using **React**, **TypeScript**, and **Tailwind CSS**.
- Built and enhanced the **Teacher Dashboard**, streamlining instructor workflows and improving efficiency by **40%** through automated progress tracking.
- Integrated RESTful APIs using reusable frontend architecture and Redux Toolkit for scalable state management.
- Implemented real-time communication features using **WebSockets**, supporting interactive chat experiences.
- Integrated payment workflows and handled authentication, API states, and transaction flows across the platform.

Sukoon E-Commerce Platform (React, TypeScript, NestJS, MongoDB)

- Built a full-stack e-commerce platform with Arabic language support, featuring product browsing, cart management, **order processing**, reviews, and wishlists.
- Implemented a responsive React frontend with lazy-loaded components, context providers (Auth, Store, Cart), and React Router for pages like Home, Checkout, and **Admin Dashboard**.
- Developed a **NestJS** backend with REST APIs for authentication (JWT, **Google/Facebook OAuth**), product management, and **category hierarchy**, integrated with MongoDB and **Cloudinary**.
- **Managed project** using **Notion** for task tracking, sprint planning, and client collaboration, ensuring timely delivery of localized features like a floating WhatsApp button and **payment gateways**.

Image Subscription Platform (React, NestJS, MongoDB, Stripe)

- Built a scalable SaaS platform with role-based access (RBAC).
- Integrated Stripe payments, reducing checkout failures by 25% via optimized transaction flows.
- Secured authentication using JWT Passport + OAuth (Google/Facebook) and implemented real-time email notifications.

FreshChat – Real-Time E-Commerce Chat App (NestJS, React, WebSockets, MongoDB)

- Developed a **real-time messaging system** with **Socket.io**.
- Enhanced security via **JWT authentication** and **crypto-encrypted passwords**.
- Implemented **user presence tracking** (online/offline) and **message history sorting**.

School Management System (React, Redux, PostgreSQL, Express)

- Designed a **multi-role system** (Admin/Teacher/Student) with **PostgreSQL optimization**.
- Implemented **Redux for state management**, ensuring seamless data flow across components
